

VIROROPES

INTRODUCING ANOTHER HIGHLY-CUSTOMIZABLE PRODUCT, VIROROPES, USED FOR DECORATIVE APPLICATIONS.

With new creative method and manufacturing, Viro replicates the beauty of tropical water hyacinth in their environmentally friendly all-weather fiber and applies it into Viroropes.

The fiber is 100% HDPE (High Density Polyethylene), which means it is non-toxic. It does not contain any plasticizer unlike PVC. Viroropes is long lasting and 100% recyclable. Its durability is evidenced by its weather resistance and, in particular, its highly tested ability to withstand UV rays. Through intensive quality control Virofiber used in Viroropes meets ISO 9001-2008 system standards.

Viroropes is available in two item of diameter; 7 millimeter and 11 millimeter, and six beauty colors; Off-white, Black, Euro Ash, Tropical, Nigerian Satinwood, Brown Oak.

Viroropes features include:

- Totally maintenance free.
- Does not chip, peel, fade, or discolor in the elements.
- Resists termites and other pests.
- Water and all weather resistant.
- Washable
- Available with built-in flame retardant formulation.

Viro is the premier provider of high-end, synthetic fiber, wicker, and thatch. Founded by Junus Sumardi in the early 1980s, this family run company is based in Indonesia, with factories in Indonesia and China.
